

PRO-GROW is a concentrated liquid fertilizer containing special penetrating agents to assure quick absorption into the soil – so nutrients can be immediately assimilated by plants. PRO-GROW contains balanced nutrients of organic nitrogen for prolonged growth and inorganic nitrogen for rapid greening and lush top growth. Phosphorous promotes strong root growth and potassium develops healthy, disease resistant stalks. Regular feedings spaced over the growing season produce superior results over a single, heavy feeding.

KEEP FROM FREEZING. Cold or freezing weather may cause this product to separate or thicken. This will not harm performance. Before using, warm to room temperature and stir thoroughly.

16-8-4 LIQUID FERTILIZER

GUARANTEED ANALYSIS

Total Nitrogen (N)	16%
<small>(2.66% Ammoniacal Nitrogen and 13.34% Water Soluble Nitrogen)</small>	
Available Phosphorus as Phosphoric Acid (P ₂ O ₅)	8%
Soluble Potash (K ₂ O)	4%
<small>6.6% Chlorine (Maximum) Derived from Aqua Ammonia, Urea, Poly Phosphate and Muriate of Potash.</small>	

CAUTION

May be harmful if swallowed. Avoid contact with eyes or mucous membranes. In case of contact, flush with plenty of cool water for at least 15 minutes.

DIRECTIONS:

For use on golf courses, ornamental turf and athletic fields, dilute 1 gallon of PRO-GROW with sufficient water for even application over 3000 square feet. Repeat this application every 3 weeks, from early spring to mid-summer. Make the first application just prior to spring greening.

For trees and shrubbery, mix 1 quart of PRO-GROW in 15 gallons of water and spray on foliage to the point of run-off.

For root feeding, use 4 ounces of PRO-GROW per inch of trunk diameter. Dilute with sufficient water and pour or inject into root zone. Repeat application every spring and fall.
